Buying Food Locally

Quick recall for food carbon footprint

Easy access on campus

Malaysia produces enough of many fruits and vegetables

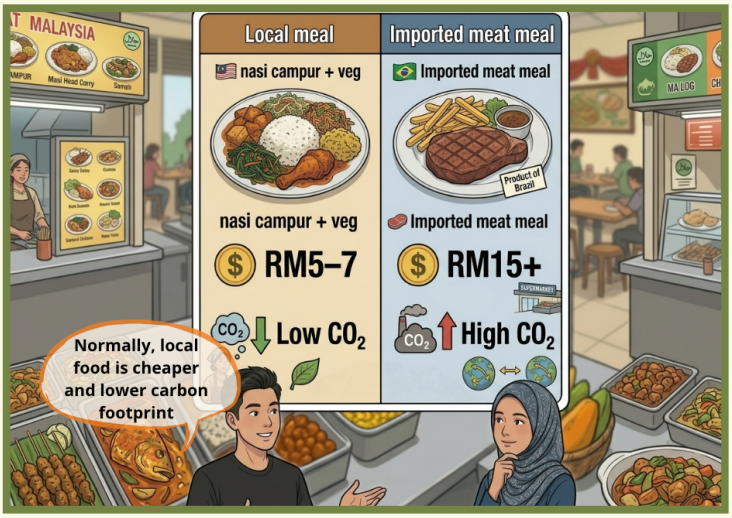

* SSR measures the percentage of domestic food consumption that is produced locally within a country

Choosing food locally

Fruit	Vegetable	Animal Protein
papaya	**tomato**	**egg**
watermelon	**salad**	**tuna**
starfruit	**brinjal**	**shrimp**
jack fruit	**cucumber**	tilapia
durian	**spinach**	freshwater catfish
pineapple	**long bean**	poultry meats
banana	**sweet corn**	torpedo scad
rambutan	**lady's finger**	cattlefish

Buying Food Locally

Buying food locally

Sustainable Diet Checklist

- ☑ Choose local fruits
- ☑ Pick local vegetables
- ☑ Try tofu or tempeh
- ☑ Reduce imported meat

*Locally grown food can be a good option, especially when it is in season. **But "local" alone does not guarantee a lower environmental impact. How food is produced, transported and packaged, and how much is wasted, also matters.** Choose affordable food you will eat, and buy only what you need.
