# Our Choice Matter

## Food also has carbon footprint

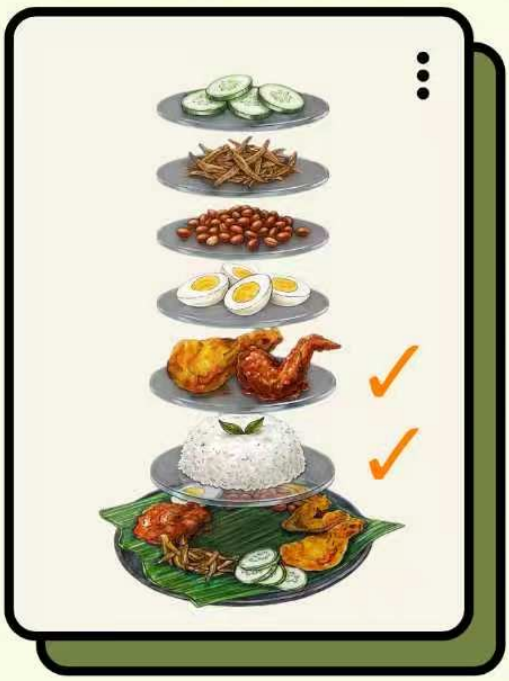

**Food carbon footprint** is the total greenhouse gas emissions produced from farm to plate, including production, transport, cooking, and waste.

Let's see the journey of your nasi lemak

- Here will focus on rice and chicken only

## Breakdown Nasi Lemak

## Start from the journey of rice

**One plate of rice ≈ 0.18 kg $CO_2$**

## Small Tips

**Take only what you can finish, reduce the waste, and help cut down the carbon footprint!**

## 2 The Journey of chicken

Meat contributes to dietary carbon emissions primarily through feed production, farming, processing, and cooking.

One serving of Chicken
≈1.82 kg $CO_2$
≈ 9.3 km of driving
≈ 1 $m^3$ of $CO_2$ Gas

Does chicken has the biggest impact?

### Per-Serving Climate Impact of Animal-based Foods

| Food Category | Carbon Food print/ kg | Equivalent Driving/ km | Equivalent $CO_2$ Gas/ $m^3$ |
|---|---|---|---|
| Beef MAX | 15.5 | 78.7 | 8.46 |
| Lamb | 5.84 | 29.6 | 3.19 |
| Prawns | 4.07 | 20.7 | 2.22 |
| Pork | 2.4 | 12.2 | 1.31 |
| Chicken ✓ | 1.82 | 9.3 | 1 |
| Fish | 1.34 | 6.8 | 0.73 |
| Egg | 0.53 | 2.7 | 0.29 |

## Per-Serving Climate Impact of Snacks & Processed Foods

| Food Category | Carbon Footprint/ kg | Equivalent Driving/ km | Equivalent $CO_2$ Gas/ $m^3$ |
|---|---|---|---|
| Cheese | 2.79 | 14.2 | 1.52 |
| Dark Chocolate Bar | 0.95 | 4.8 | 0.52 |
| Nuts (mixed) | 0.05 | 0.3 | 0.03 |

## Per-Serving Climate Impact of Plant-based Foods

| Food Category | Carbon Footprint/ kg | Equivalent Driving/ km | Equivalent $CO_2$ Gas/ $m^3$ |
|---|---|---|---|
| Tomato | 0.32 | 1.6 | 0.17 |
| Barries | 0.22 | 1.1 | 0.12 |
| Rice | 0.16 | 0.8 | 0.09 |
| Banana | 0.11 | 0.5 | 0.06 |
| Tofu | 0.08 | 0.4 | 0.04 |
| Apple | 0.06 | 0.3 | 0.03 |
| Brassicas (e.g., broccoli) | 0.05 | 0.3 | 0.03 |
| Orange | 0.05 | 0.3 | 0.03 |
| Potatoes | 0.05 | 0.3 | 0.03 |
| Root Vegetables (e.g.,carrots/ radish) | 0.04 | 0.2 | 0.02 |

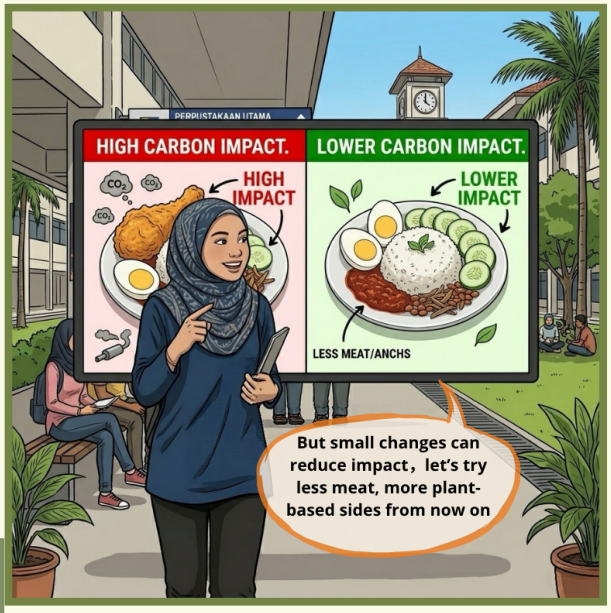

- Carbon footprints can vary depending on how and where food is produced, processed, and transported.
- The values shown are general estimates to help compare foods, not exact measurements.

## Sustainable Diet Checklist

- ☑ Choose more plant-based food
- ☑ Choose more local food
- ☑ Reduce food waste

**Think before you eat**

**Small choices = Lower carbon footprint 🌍**
